

## **Embryology: The inside out story!**

---

Time to make sense of embryology development and its' application.

From the cranial sacral practitioner to the homeopath this is the time to get re-acquainted with the stem cells. Tissue time is upon us!

From notocord to remedy picture, through to the organizing principle of the Breath of Life. Let us anchor our knowledge from the still point to the replication and effects of disease, confusion or sense of chaos.

All cultures recognize that illness and disease involve a degree of chaos. As does wellness. What tissue is presenting itself? What is permeating disoriented tissue and fluid systems? How does understanding tissues "inside out" help you as a practitioner?

By request from many anatomy course participants, Carol-Anne has designed this course. In alliance with her original work in specialized kinesiology, homeopathy and the pool of knowledge related to sacred space, Carol-Anne invites those who want to know and explore embryology to expand their understanding.

**Date: Saturday and Sunday March 18 and 19**

**Time: 10am-4:30pm**

**Call for details, to register and also to qualify for enrollment.**

**604-255-3110**
