

Embryology: The inside out story!

Time to make sense of embryology development and its' application.

For the cranial sacral practitioner to the homeopath this is the time to get re-aquainted with the stem cells. Tissue time is upon us!

From notocord to remedy picture thru to the organizing principle of the Breath of Life. Let us anchor our knowledge from the still point to the replication and affects of disease, confusion or sense of chaos.

All cultures recognize that illness and disease involve a degree of chaos. As does wellness. What tissue is presenting itself? What is permeating disoriented tissue and fluid systems? How does understanding tissues "inside out" help you as a practitioner?

By request from many anatomy participants Carol-Anne has designed this course. In alliance with her original work in specialized kinesiology, homeopathy and the pool of knowledge related to sacred space; Carol-Anne invites those who want to know, explore embryology and expand their understanding.

Date: Saturday and Sunday TBA

Time: 10am-4:30pm

Cost: \$220.

Call for details, to register and also to qualify for enrollment.
